

Chilton Enterprises custom web sites and designs
www.ChiltonEnterprises.Com

Congratulations on your decision to have your custom web site designed for your business or personal use. On your end this will be quite exciting and you can use this to market and promote you business, hobby, sport, etc...

I can design a nice simple one-page web site or a multiple page web site for you. This is what I will require.

You will need to provide me the material for your web site. This means that generally you will need to write out preferably on Microsoft Word or some other similar program what you want to say. An outline of your material.

- Provide me with the content for your site.
- Domain name of your site, I can help with this (need your username & password), for instance www.mybusiness.com is the domain name.
- Hosting company, you are using (need your username & password)
- Send or e-mail me the photos you wish to use
- Your e-mail address and contact info: address, city state, etc..

Web site cost: For a one page web site the price is \$150.00 and for a multiple page web site the cost can start from \$300.00 and up. I will require the full initial fee up front prior to proceeding on the web site.

Domain names can be purchase very cheaply, for about \$10.00 a year. Here are some of the addresses where you can go online to get one:

- www.Kickstartdomains.com
- www.networksolutions.com
- <http://www.register.com>

You can also go to Google.com and just type in the word domain names.

For your Hosting company, which is the place where your web page will be held out in cyber space so to speak you can also go to Google.com and just type in the word web hosting. Here are some examples:

- <http://hurricane-internet.com>
- www.bravenet.com

I will be more than happy to assist you on these, most are very economical. If you have any questions please feel free to Call or e-mail me. (e-mail is best).
